

CONTENT – Demonstrate Mathematical Reasoning. Advanced Skills.

M1/E1. Connecting area of shapes with algebra -----	5 – 9
M2. Solving quadratics $ax^2 + bx + c = 0$, where $a \neq 1$ -----	10, 11
M3/E3. Finding the co-ordinates of intersection of straight lines -----	12 – 18
M4/E4. Connecting area of shapes with theorem of Pythagoras -----	19 – 25
M5. Connecting area of shapes with trigonometry -----	26 – 32
M6/E6. Solving exponential equations with different bases-----	33 – 35
M7. Finding the equation of a parabola-----	36 – 44
M8. Simplifying and solving equations with quadratics-----	45 – 47
M9. Solving rational inequations -----	48, 49
E10. Solving rational equations leading to quadratic equations -----	50,51
M11. Trigonometry in 3D -----	52 – 54
M12. Problems involving compound shapes and solids -----	55 – 60
M13/E13. Problems involving volume of solids -----	61,62
M14/E14. Finding equations of exponents from tables -----	63 – 69
M15. Solving simultaneous equations. Substitution method -----	70,71
M16/E16. Solving simultaneous equations. Elimination method -----	72 -77
M17/E17. Forming and solving simultaneous equations -----	78,79
M18/E18. Algebraic proofs -----	80 – 82
